

DAYS LEADING UP TO WEDDING/EVENT

the fine print

WEDNESDAY

PRO TIPS:

1. You can pull recipes for bouquets once processed (cleaned up) and place each in the bouquet vase so they can hydrate overnight. Doing this can save you time the following day so the bouquets are ready to be assembled!
2. Set aside recipes for larger work like the arbor or ceremony arrangements (if those are in your design) that way you will not be tempted to use them for bouquets or centerpieces! Pulling (or setting aside) recipes will help you keep track of your floral so you don't over-use! Stick to the recipes!

THURSDAY

DESIGN THE BRIDAL BOUQUET

- I like to do this first because I can pick out the prettiest blooms and it sets the tone for the rest of the wedding. They are fun!
- Set aside a good amount of time for this, let's say around 2 hours.

START CENTERPIECES

- When the bouquets are done you can move on to centerpieces.
- You can pull each recipe for the centerpiece as you go or you can do what you did with the bouquets and pull all the centerpiece recipes, just make sure the flowers are in water.
- Once you are done assembling the centerpieces start on Bud vases (if they are in your design)

START ON BRIDESMAIDS BOUQUETS

- Each should take about 20 minutes.
*Your first will take you longer but that is normal. You'll pick up speed after that.
- Bouquets can take most of the morning depending on how many you need to make and how many helpers you have.
- Make sure you have a place to put all of the bouquets, in a cool dark place is ideal.

PRO TIPS:

1. Pull your recipes first. Which means pull each flower listed on the recipe out of the hydration bucket and place it in a vase or smaller container. Do this for each arrangement you need. (Need more clarification? Check out this quick tutorial) Again, this makes the assembly process run smoother/faster.
2. Always save the little extras that you pull off of greenery and flowers, they come in handy later for the detail items such as boutonnieres and corsages! I like to do bud vases after the bouquets and centerpieces because you save all of the little off-shoots and pieces you didn't need from those items and they are PERF for bud vases, corsages, and bouts. I keep a small vase or cup next to me with water to put them in.
3. At the end of the day check water levels on bouquets, centerpieces, and bud vases and fill vases as needed to keep the flowers hydrated. Make sure that all flower stems are in clean water in the buckets and all greenery is in water.

FRIDAY

FINISH UP ANY LOW
CENTERPIECES YOU HAVE

If you are doing Tall Centerpieces I would start designing them (if you haven't already). Again, the first will take you the longest then you will pick up speed after that. The more helpers you have the faster it will go.

MAKE/TIE YOUR AISLE
MARKERS/FLOWERS

You can make these and put them in water until it's time to put them out for the wedding.

MAKE YOUR BOUTS

Make sure you use our [Bout Hack](#) on our blog to help you keep them fresh! You can also do this two days ahead using the hack.

MAKE YOUR CORSAGES

If you want to keep these in the fridge to keep them fresh make sure they are away from produce and bump the temp up a tad.

MAKE ANY OTHER DETAIL
ITEMS YOU NEED

Such as flower crowns, or flower girl items.

WRAP THE BOUQUETS WITH
RIBBON AND PIN THEM

Use either a 1/2" or 1" ribbon to wrap the stems to cover either the zip tie or tape. Pin the ribbon in place with a few pins.

FINISH ANY OTHER WORK YOU
MAY HAVE FOR THE BIG DAY!

If you are doing an arbor or arch piece go ahead and pull those recipes into one bucket (or two), that way you can have that ready to go to either do yourself or hand off on the wedding day.

WRAP THE BOUTONNIERES

Wrap with 5/8" ribbon and make sure each has two pins.

SATURDAY

CHECK ALL PIECES FOR
FRESHNESS & CHECK OFF LIST

You may have a friend or family member do this to make sure you haven't skipped over anything.

SET IT ALL UP!

Use the diagram of the venue you made to help set-up run smooth!

TRANSPORT ALL FLOWERS TO
THE VENUE

Following our transportation guidelines, we suggest delegating this to Type A - Aunt Tammy or trusted friends/family members. Make sure you give them the checklist!

INSTALLATIONS

- Give yourself some extra time if you have an on-site arrangement to do like an arch or arbor. 30-45 minutes for prep/load in, 1hr to 2 hrs to execute. Feel free to farm it out to your most trusted associates.
- I would give no less than an hour and a half to do any installation and make sure it is finished at least two hours before the ceremony (if not more).
- Also take into consideration when you will be taking photos and the temperature outside.

Feel free to adjust this timeline to fit your wedding needs. This is a suggested timeline to help you keep things on track!
